

MAX is an intelligent cash management service that helps individual investors earn dramatically higher yields on their cash, with increased FDIC insurance coverage. With Max, clients can open multiple online savings accounts in minutes and earn more forever.

In addition to preferred rates and terms, Max helps clients rebalance their accounts each month so that they can earn the highest available interest rates, even as rates change.

A dashboard enables clients to view all their account balances, request transfers, and monitor performance. Clients maintain full, same-day liquidity over their funds, which are held directly in their own names in their own FDIC-insured bank accounts.

Most clients choose Max Checking, an integrated, free checking account, to handle transfers between accounts as rates change. Others use an existing, supported account and set up a monthly sweep. For more details visit [MaxMyInterest.com/CashSweep](http://MaxMyInterest.com/CashSweep)
